SUMMARY

Full-stack Software Engineer with 4+ years of experience building scalable mobile (Flutter/Dart) and web applications (Laravel/Vue.js) and a strong backend foundation in Spring Boot and Python. Expert in RESTful API development, state management (BLoC/GetX), and cross-platform optimization. Proficient in relational and NoSQL databases (MySQL, MongoDB) with a commitment to clean architecture, TDD, and user-centered design. Adaptable to diverse platforms and technologies, leveraging a solid technical base to deliver robust solutions in Agile environments.

EXPERIENCE

Mobile Application Developer

YES, for online services | Jul. 2023 – Aug. 2024 | Hybrid | Syria

- Developed and deployed 3+ Flutter apps, optimizing backend in Firebase to reduce load time by 30%, and integrating RESTful APIs with UX-designed interfaces.
- Maintained legacy projects, conducted testing, and managed version control with Git.

Junior ICT Engineer

*BATEC (Regional Gypsum Board Company BEAM) |
Sep. 2023 – Mar. 2024 | Syria*

- Resolved 95% of critical incidents within SLA, reducing vulnerabilities by 40% through security policy implementation.
- Automated hardware inventory tracking with Python scripts and provided remote technical support.

LANGUAGES

Arabic (Native) | English (C1) | Spanish (B2) | French (A1)
